## **1. Purpose of Report**

- 1.1 To present the Governing Body with the first public update in the Essex Success regime.

## **2. Background**

- 2.1 The Essex Success Regime is one of three such programmes in the country. It is part of the NHS Five Year Forward View, which is a blueprint for the NHS to take decisive steps to secure high quality, joined-up care. It sets out the challenges facing health and care nationally and how radical change is needed to sustain services into the future and improve care for patients.
- 2.2 The Success Regime is concentrating on certain areas in the country where there are deep-rooted, systemic pressures. The overall aim is to improve health and care where these systems are managing financial deficits or issues of service quality or both.
- 2.3 In Essex, the Success regime concentrates on mid and south Essex and NHS Southend Clinical Commissioning Group is playing a key role in the developing work of the programme. The first major clinical leaders meeting took place at the end of January and was attended by the CCG's chair, Dr José Garcia Lobera.
- 2.4 At the end of January, the programme team published its first public briefing note which outlines the latest position of the Essex Success Regime and sets out next steps. The briefing note sets out the scale of the challenge facing the county and the extent of some of the changes and decisions which could be made.
- 2.5 The briefing also makes a clear commitment to involve local people and stakeholders in this work by providing regular engagement opportunities, programmed into the overall schedule.
- 2.6 The Success Regime does present some exciting opportunities for the health system in Southend and it is important to remember that it brings management and financial support to the area in order to help us unblock any barriers to change.

## **3. Recommendation**

- 3.1 The Governing Body is asked to note this briefing document.
